TauOpen 2.0

Welcome to NEW

TAU OPEN

TauOpen is an app conceived to control your gate, garage door, barrier and other devices at any time, wherever you are, thanks to your smartphone.
It's required to install the T-CONNECT module inside the automation control unit or the T-GATEWAY, which will be connected via Wi-Fi or via cable to the home network, and it will communicate via radio, through the final MOOFY modules placed inside the automation.
Free download the TauOpen app to start controlling your automation remotely.

With TauOpen:

- **EVERYTHING IS UNDER CONTROL.** Thanks to the access control interface, it is possible to remotely manage the automation or the various automations in multiple sites, to check their status or simply to command the opening and closing of the automation.

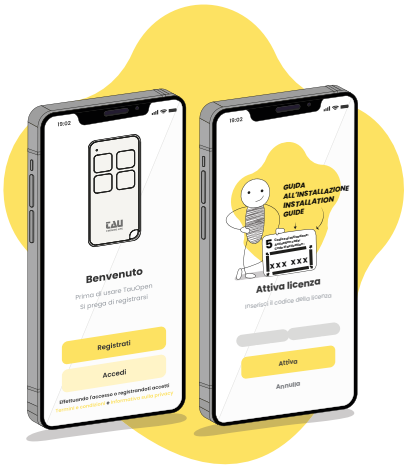
- **EVERYTHING IS SIMPLE AND INTUITIVE.** Activating the access has never been easier. After configuring the application, simply enter the serial number of the T-CONNECT device and the activation code for the use with the first 3 smartphones.
For the use with additional smartphones it will be necessary to purchase other activation codes.

Available on:

Download on the App Store

Google play

1. Download TauOpen on your smartphone



2. Register and activate the app using the activation code

3. Enter your automated systems and configure them by entering the serial code or by scanning the QR CODE that you find on each device.

4. Control your automation remotely even when you are not at home!
